EVEN MORE ROOM FOR SAFETY

The safety of both driver and passengers is of critical importance in the design of the Nissan NV350 Urvan. Features such as an Anti-lock Braking System, Brake Assist, collapsible impact zones and front airbags combine to make every journey as safe as it is comfortable.

-  Crumple Zone
-  Occupant Zone

Zone Body construction enhances cabin safety by combining impact-absorbing "crumple zones" with a high-strength "occupant zone" to protect passengers.

SRS (Supplemental Restraint System) airbags standard for the driver (on all models) and front seat passenger (on selected models) help to reduce the risk of injury resulting from impact.

Anti-lock Braking System (ABS) helps prevent skidding during emergency braking. Brake Assist (BA) enhances full braking performance in emergency situations (on selected models).

The driver and front seat passenger seats are equipped with seatbelts featuring pretensioners and load limiters. In minibus models, each rear passenger seat features 2-point seatbelts.
